

Guidelines for acceptable storm/screen doors:

All storm/screen doors should be heavy enough to withstand inclement weather. All storm/screen doors must blend as much as possible with the existing front door color. The only exceptions would be those that have a narrow exterior frame and solid glass or screen interior. These doors could have a white or almond colored paint to act as a frame to the front door. Example:

NOT ALLOWED: Security doors with iron bars and doors with pet doors inserted in the bottom. The screened/glass portion of door should show majority of front door. Some examples of what is not allowed:
